

BLACKBOX BATTERY

unfold to unlock 

DID YOU KNOW?

BATTERY MONITORING
UNLOCKS MASSIVE
POTENTIALS FOR YOU
AND THE ENVIROMENT

+50% Up to 50% longer life by properly adjusting the SOC levels during operation and stand still

5.000 € Up to 5000 €/year per capacity test can be saved

2% Almost 2% of all Korean stationary batteries burnt – also due to improper monitoring

30% Up to 30% Total Cost of Ownership savings possible

0 € Only a health certificate will enable profitable resell prices

80% 80% SOH – This value is taken as end-of-life criteria. We believe this is unnecessarily conservative

WHAT WE DO

NO ADDITIONAL SENSORS

We only use the huge amounts of data that every battery generates

SYSTEMATIC ANALYSIS

Our platform cracks open this treasure – automatically and at scale

UNLOCKING POTENTIALS

We reduce the chaos to the essential insights and actions

> 10 YEARS OF EXPERIENCE

MULTIPLATFORM INTEGRATION

EASY TO USE AND AFFORDABLE
